

# Spinal Urology

The overview of Neurourology

**THURSDAY, 14 SEPTEMBER 2023 | 5:30 PM - 7:30 PM AWST**

ANZUNS in collaboration with Coloplast, is excited to extend this invitation to all dedicated urology nurses looking to enhance their knowledge and skills in the specialised realm of neurourology.

Neurourology is a vital area of expertise for urology nurses, as it addresses the unique challenges associated with patients suffering from neurogenic bladder dysfunction. This webinar will provide an invaluable platform for you to deepen your understanding of neurogenic bladder conditions, their aetiology, assessment, and evidence-based interventions.

Our speakers, who are experts with special interests in the field of neurourology, will share practical insights, case studies, and best practices. You'll gain crucial tools to better care for patients with urological dysfunction associated with neurological conditions.

Join us for an enriching session dedicated to advancing your skills and knowledge in neurourology, empowering you to provide exceptional care and support to your patients. Don't miss this opportunity to connect with fellow urology nurses and experts in the field.

## LOCATION:

ONLINE WEBINAR

## PROGRAM & REGISTRATION

Scan the QR code below

## IMPORTANT

After successful registration, you will receive two confirmation emails:

Zoom - you may use this link, should you prefer to join using the Zoom app.  
GlueUp - use this link to join the webinar through your GlueUp account. Alternatively, you can login to your GlueUp account and join the webinar through the events tab.
